

Part number:

# AISR Serial Interface Adapter (with M8 connector) for FABER-COM electronic cards

## DESCRIPTION

The AIS Serial Interface Adapter is the only medium to connect FABER-COM electronic devices (STU electronic card and JS/JP/JC joysticks) to a PC for programming, calibration, firmware updating and working parameters monitoring.

The communication between the device and PC is supported by SepSim, a Windows application (Win98/Win 2K/XP tested). The "Lite" version of SepSim is provided freely when the device is purchased.

With this application a device configuration can be saved to a file and downloaded into another device.

The application requires a serial port or a USB to RS232 converter.

The program file is self-installing and the application is extremely user friendly.

AIS is provided with a 1,80 m long serial cable (DB9 male/female).

On the right is showed the main page of SepSim.
